

Introduction

Key people / dates

 Woolmore Primary School	Designated Safeguarding Lead (DSL), with lead responsibility for filtering and monitoring	Hannah Williams
	Deputy Designated Safeguarding Leads / DSL Team Members	Susan Sibley Mason Mabel Samba Farzanah Seedat
	Link governor for safeguarding	Christine Frost
	Link governor for web filtering:	Dale Mendez
	Curriculum leads with relevance to online safeguarding and their role e.g. PSHE/RSHE/RSE/Computing leads	Hodan Mohamed Gemma Purdy and Michael Johnston
	Network manager / other technical support	Clever ICT / Joseph Long
	Date this policy was reviewed and by whom	Hannah Williams – September 2026
	Date of next review and by whom	Hannah Williams – September 2027

What is this policy?

Online safety is an integral part of safeguarding and requires a whole school, cross-curricular approach and collaboration between key school leads. Accordingly, this policy is written in line with 'Keeping Children Safe in Education' (KCSIE), 'Teaching Online Safety in Schools', statutory RSHE guidance and other statutory documents. It is cross-curricular (with relevance beyond Relationships, Health and Sex Education, Citizenship and Computing) and designed to sit alongside or be integrated into your school's statutory Child Protection & Safeguarding Policy. Any issues and concerns with online safety must always follow the school's safeguarding and child protection procedures.

Who is it for; when is it reviewed?

This policy is a living document, subject to full annual review and amended where necessary during the year in response to developments in the school and local area. Although many aspects will be informed by legislation and regulations, we will involve staff, governors, pupils and parents in writing and reviewing the policy and make sure the policy makes sense and is possible to follow in all respects. This will help all stakeholders to understand the rules that are in place, why they are, and how the policy affects day-to-day practice. Acceptable Use Policies (see safepolicies.lgfl.net) for different stakeholders help with this. Any changes to this policy will be immediately disseminated to all the above stakeholders.

Who leads online safety?

KCSIE makes clear that "the Designated Safeguarding Lead should take **lead** responsibility for safeguarding and child protection (including online safety and understanding the filtering and monitoring systems and processes in place)." The DSL can delegate activities but not responsibility for this area, and whilst subject leads (e.g. for RSHE) will plan the curriculum for their area, it is important that this ties into a whole-school approach.

What were the main online safety risks in 2025/2026?

There are 4 types of online safety risks outlined in KCSIE:

CONTENT: being exposed to illegal, inappropriate, or harmful content, for example: pornography, racism, misogyny, self-harm, suicide, antisemitism, radicalisation, extremism, extreme sexual or physical violence, misinformation, disinformation (including fake news) and conspiracy theories,

CONTACT: being subjected to harmful online interaction with other users or generative AI applications that simulate this; for example: peer to peer pressure, commercial advertising and adults posing as children or young adults with the intention to groom or exploit them for sexual, criminal, financial or other purposes,

CONDUCT: online behaviour that increases the likelihood of, or causes, harm; for example, making, sending and receiving explicit images, including those generated using AI and online bullying, and

COMMERCE: risks such as online gambling, inappropriate advertising, phishing and or financial scams.

It is the responsibility of all staff to understand the above, recognise when a child may be experiencing harm related to the above, and report to the DSL.

Online Safeguarding Trends at Woolmore

In our school over the past year, we have noticed the following in terms of device use and abuse and types of online/device-based incidents which affect the wellbeing and safeguarding of our pupils:

Online Safeguarding Trends at Woolmore

- Over the past year, families have needed more support to understand and set up safety restrictions and parental controls on children's devices.
- Children have reported issues linked to online gaming, particularly on platforms such as Roblox.
- Some incidents have involved children sharing passwords with peers.
- There have been concerns about unkind or inappropriate online conversations between children.
- Less frequently, children have reported communicating online with people they do not know but these are friends of friends invited into chats.
- Some children are using devices unsupervised at home.
- Families are sometimes allowing children to access platforms, games or apps that are not age appropriate.

How will this policy be communicated?

This policy can only impact upon practice if it is a living document. It must be accessible to and understood by all stakeholders. It will be communicated in the following ways:

- Posted on the school website
- Part of school induction pack for all new staff (including temporary, supply and non-classroom-based staff and those starting mid-year)
- Integral to safeguarding updates and training for all staff
- Clearly reflected in the Acceptable Use Policies (AUPs) for staff, volunteers, contractors, governors, pupils and parents/carers (which must be in accessible language appropriate to these groups), which will be issued to whole school community, on entry to the school, annually and whenever changed, plus displayed in school
- Discussed in parent webinars/workshops

Overview

Aims

This policy aims to promote a whole school approach to online safety by:

- Setting out expectations for all Woolmore Primary community members' online behaviour, attitudes and activities and use of digital technology (including when devices are offline).
- Helping safeguarding and senior leadership teams to have a better understanding and awareness of all elements of online safeguarding through effective collaboration and communication with technical colleagues (e.g. for filtering and monitoring), curriculum leads (e.g. RSHE / HRE) and beyond.
- Helping all stakeholders to recognise that online/digital behaviour standards (including social media activity) must be upheld beyond the confines of the school gates and school day, regardless of device or platform, and that the same standards of behaviour apply online and offline.
- Facilitating the safe, responsible, respectful and positive use of technology to support teaching and learning, increase attainment and prepare children and young people for the risks and opportunities of today's and tomorrow's digital world, to survive and thrive online.
- Helping school staff working with children to understand their roles and responsibilities to work safely and responsibly with technology and the online world:
 - for the protection and benefit of the children and young people in their care, and
 - for their own protection, minimising misplaced or malicious allegations and to better understand their own standards and practice.
 - for the benefit of the school, supporting the school ethos, aims, and objectives, and protecting the reputation of the school and profession.
- Establishing clear structures by which online misdemeanours will be treated, and procedures to follow where there are doubts or concerns (with reference to other school policies such as Behaviour Policy or Anti-Bullying Policy).

Scope

This policy applies to all members of the Woolmore community (including teaching, supply and support staff, governors, volunteers, contractors, pupils, parents/carers, visitors and community users) who have access to our digital technology, networks and systems, whether on-site or remotely, and at any time, or who use technology in their school role.

Roles and responsibilities

This school is a community, and all members have a duty to behave respectfully online and offline, to use technology for teaching and learning, to prepare for life after school, and to immediately report any concerns or inappropriate behaviour, to protect staff, pupils, families and the school reputation. We learn together, make honest mistakes together and support each other in a world that is online and offline at the same time.

All members of the school community should **read the relevant section in Appendix A of this document** that describes individual roles and responsibilities. Please note that there is one for 'All Staff' that must be read by all staff, including those who have a named role in another section. There are also role descriptions in the Appendix A, e.g. pupil, governor, etc. All staff have a key role to play in feeding back on potential issues.

Education and curriculum

Despite the risks associated with being online, Woolmore Primary recognises the opportunities and benefits for children too. Technology is a fundamental part of adult life and so developing the competencies to understand and use it, is critical to children's later positive outcomes. The choice to use technology in school will always be driven by pedagogy and inclusion.

At Woolmore we engage our pupils in discussions about online safety and technology use whenever the opportunity arises – across many areas of the curriculum and particularly when we allow children on the chrome books. It is specifically taught in PSHE / Health and Relationships and Computing but also in whole school and phase assemblies. This helps us to ensure that our teaching of online safety is up to date and responsive to children's experiences and needs.

As well as teaching about the underpinning knowledge and behaviours that can help pupils navigate the online world responsibly, safely and confidently regardless of the device, platform or app, Teaching Online Safety in Schools recommends embedding teaching about online safety and harms through a whole school approach and provides an understanding of these risks to help tailor teaching and support to the specific needs of pupils, including vulnerable pupils.

HRE (RSHE) guidance also recommends that schools assess teaching to "The curriculum should build knowledge and skills sequentially, with regular feedback provided on pupil progress. Lessons should ensure that all pupils are challenged, and assessments should identify where pupils need extra support or intervention." [See LGfL's SafeSkills Online Safety Quiz and diagnostic teaching tool which is linked to statements from UKCIS Education for a Connected World framework, enabling teachers to monitor progress throughout the year and drill down to school, class and pupil level to identify areas for development at safeskillsinfo.lgfl.net]

The teaching of online safety, features in these areas of curriculum delivery:

- Relationships education and Health education (also known as HRE or PSHE)
- Computing

However, it is the role of ALL staff to identify opportunities to thread online safety through all school activities, both outside the classroom and making the most of unexpected learning opportunities as they arise.

Whenever overseeing the use of technology in school or setting as homework tasks, all staff will encourage sensible use, monitor what pupils are doing and consider potential risks and the age appropriateness of tasks. This includes supporting them with search skills, reporting and accessing help, critical thinking (e.g. bias, disinformation, misinformation, and conspiracy theories), access to age-appropriate materials and signposting, and legal issues such as copyright and data law. saferesources.lgfl.net has regularly updated theme-based resources, materials and signposting for teachers and parents.

At Woolmore, we recognise that online safety and broader digital resilience must be threaded throughout the curriculum and that is why we adopt the cross-curricular framework 'Education for a Connected World – 2020 edition' from UKCIS (the UK Council for Internet Safety).

Annual reviews of curriculum plans / schemes of work (including for SEND pupils) take place and are used as an opportunity to follow this framework more closely in its key areas. This is done within the context of an annual online safety audit, which is a collaborative effort led by Hannah Williams and Hodan Mohamed.

We communicate with parents and carers about how we support pupils with their online safety learning as well as practical measures they can take to protect their children at home. This year we consulted with our parents on their views around how we can support families in keeping children safe online as part of the new RSHE curriculum (see website for HRE policy which includes a summary of results from the parent consultation). When parents come into the building for open days, we always have an 'Online Safety Stall' with age-appropriate information for parents in ways to help support them at home. We have run 3 online safety workshops last year and plan to do more this year. Online safety information is also included in the newsletters which get sent home to parents regularly throughout the year.

We utilise data from our safeguarding reports, filtering logs, monitoring captures, parental complaints and other stakeholder feedback to inform our curriculum, so that we are constantly learning from concerns and being reflexive and responsive to the needs of our children.

We recognise that nationally, children with SEND are less likely to receive effective online safety teaching but are more at risk of being a victim of harm caused online. Therefore, at Woolmore, we will ensure that we adapt our curriculum and teaching of online safety for all children, especially those with SEND. We would consider targeted and individual interventions that children need to protect them from harm and prevent future online harm.

We communicate with parents and carers about how we support pupils with their online safety learning, including what their children are being asked to do online and the sites they will be asked to access by e.g. sharing this policy, sharing the curriculum, including info. in newsletters, webinars etc. In our parent consultation we asked if parents have a preferred language for workshops – whilst the majority said English some did request Bengali and we will work with other parents to execute this.

Handling safeguarding concerns and incidents

Online safety concerns are safeguarding concerns. They must be handled in the same way as any other safeguarding concern. Safeguarding is often referred to as a jigsaw puzzle, so all stakeholders should speak to the safeguarding lead with any concerns (no matter how small they seem) to contribute to the overall picture or highlight what might not yet be a problem.

Support staff will often have unique insight and opportunity to find out about issues first in the playground, corridors, toilets and other communal areas outside the classroom.

School procedures for dealing with recognition and response to online safety will be mostly detailed in the following policies:

- Safeguarding and Child Protection Policy
- Anti-Bullying Policy
- Behaviour Policy
- Acceptable Use Policies
- Prevent Risk Assessment
- Data Protection Policy, agreements and other documentation (e.g. privacy statement and consent forms for data sharing, image use etc)

This school commits to taking all reasonable precautions to safeguard pupils online, but the internet can never be 100% safe (as stated in KCSIE), and we recognise that incidents will occur both inside school and

outside school (and that those from outside school will continue to impact pupils when they come into school or during extended periods away from school).

Any suspected online risk or infringement should be reported to the DSL as soon as possible on the same day. The reporting member of staff will ensure that a record is made of the concern on a Record of Concern (ROC – Yellow Form) this includes any concerns raised by the filtering and monitoring systems (see section further on in this policy for more information).

As per the Children's Wellbeing and Schools Act (2026), there is now a mandatory duty for teachers to report any concerns of child sexual abuse, which includes sexual abuse that is facilitated by and/or takes place online (including non-contact abuse such as image sharing). Therefore, all staff must report such concerns without delay to the DSL.

Any concern/allegation about staff misuse is always (as per any safeguarding allegation) referred directly to the Headteacher, unless the concern is about the Headteacher, in which case the complaint is referred to the Chair of Governors and/or the LADO (Local Authority's Designated Officer). Staff may also use the NSPCC Whistleblowing Helpline. The school will actively seek support from other agencies as needed (i.e. the local authority, LGfL, UK Safer Internet Centre's Professionals' Online Safety Helpline (POSH), NCA CEOP, Prevent Officer, Police, IWF and Harmful Sexual Behaviour Support Service).

We will inform parents/carers of online safety incidents involving their children, Children's Services and the Police where staff or pupils engage in or are subject to behaviour which we consider is particularly concerning or breaks the law.

We ensure all online safety reporting procedures are sustainable for any unforeseen periods of closure and that staff/parents know how to report outside of normal working hours. This year we will set up and advertise our safeguarding email address which will be publicised on our school website. This will then be checked regularly by members of the school safeguarding team for any period that the school is closed.

Email: Safeguarding@woolmore.org

To deliver staff updates/training on online safety scenarios and check that staff are all confident and competent with responding and reporting as per your policy we make use of the [LGfL staff Online Safety Quiz](#). This is also a useful tool to evidence that staff understand their responsibilities.

The following sub-sections provide details on managing types of concern.

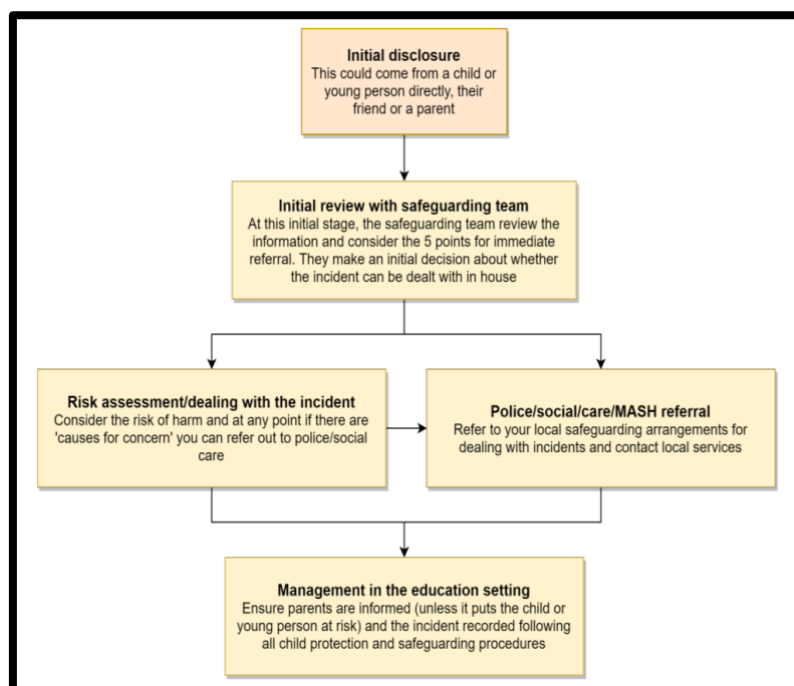

Nudes & Semi Nudes

All schools (regardless of phase) should refer to the UK Council for Internet Safety (UKCIS) guidance - [Sharing nudes and semi-nudes: advice for education settings](#).

There is a one-page overview called [Sharing nudes and semi-nudes: how to respond to an incident](#) for all staff (not just classroom-based staff) to read, in recognition of the fact that it is mostly someone other than the Designated Safeguarding Lead (DSL) to first become aware of an incident, and it is vital that the correct steps are taken. **Staff other than the DSL must not attempt to view, share or delete the image or ask anyone else to do so, but go straight to the DSL.**

Everyone must understand that whilst the sharing of intimate or sexual images involving children (created via AI or otherwise) is illegal, pupils should be encouraged and supported to talk to members of staff if they have made a mistake or had a problem in this area. The UKCIS guidance seeks to avoid unnecessary criminalisation of children.

The school DSL will use the full guidance document, Sharing nudes and semi-nudes – advice for educational settings to decide next steps and whether other agencies need to be involved (see flow chart below from the UKCIS guidance) and next steps regarding liaising with parents and supporting pupils. The school will also make use of guidance from The Marie Collins Foundation with regards to supporting victims of Technology Assisted Child Sexual Abuse.

This LGfL document (available at nudes.lgfl.net) may also be helpful for DSLs in making their decision about whether to refer a concern about sharing of **sexual imagery of children**:

Priority Areas

Upskirting

Everyone must understand that upskirting (taking a photo or video of someone under their clothing, not necessarily a skirt) is a criminal offence and constitutes a form of sexual harassment, as highlighted in Keeping Children Safe in Education. As with other forms of child-on-child abuse, pupils can come and talk to members of staff if they have made a mistake or had a problem in this area. Upskirting has become more prevalent due to the increased use of smart glasses and other discreet recording technology that can capture imagery without individuals knowing.

SAFEGUARDING QUESTION TIME

Q: WHEN SHOULD WE REFER NUDE SHARING?
A: IMMEDIATELY *IF* THE IMAGE/VIDEO:

- involves an **adult**
- is potentially **coerced**, blackmailed or groomed or concerns about **capacity to consent**
- might depict sexual acts unusual for their **developmental stage** or **violent**
- involves sexual acts / **under 13s**
- or the young person is at **immediate risk of harm**..., **suicidal** or **self-harming**

*Text compiled taken from page 20 of 'Sharing Nudes and Semi-Nudes', UKCIS – search.gov.uk

"We recommend DSLs read the entire UKCIS document, there is much more to know than this, and many helpful resources including training, scenarios and further guidance. Note also the one-pager for all staff!"

Bullying

Materials to support teaching about bullying and useful Department for Education guidance and case studies are at bullying.lgfl.net

Child-on-child sexual violence and sexual harassment

Woolmore Primary School recognises that children can be vulnerable to child-on-child sexual violence and sexual harassment, both online and offline. We are committed to maintaining a culture of vigilance where all staff understand that such behaviours are never acceptable, will not be dismissed as "banter", "part of growing up" or harmless behaviour, and must always be taken seriously. Through staff training, a robust safeguarding curriculum, clear reporting procedures and a child-centred approach, we support pupils to understand healthy relationships, respect, consent, boundaries and appropriate behaviour, while ensuring any concerns are identified, reported and responded to promptly in line with safeguarding procedures.

<https://www.contextualsafeguarding.org.uk/resources/toolkit-overview/beyond-referrals-harmful-sexual-behaviour/>

Misuse of school technology (devices, systems, networks or platforms)

Clear and well communicated rules and procedures are essential to govern pupil and adult use of school networks, connections, internet connectivity and devices, cloud platforms and social media (both when on school site and outside of school).

These are defined in the relevant Acceptable Use Policy as well as in this document, for example, in the sections relating to the professional and personal use of school platforms/networks/clouds, devices and other technology.

Where pupils contravene these rules, the school behaviour policy will be applied; where adults contravene these rules, action will be taken as outlined in the staff code of conduct/handbook.

It will be necessary to reinforce these as usual at the beginning of any school year, but also to remind pupils that the same applies to any home learning that may take place.

Further to these steps, the school reserves the right to withdraw – temporarily or permanently – any or all access to such technology, or the right to bring devices onto school property.

Social media incidents

As of June 2026, the UK Government has announced that social media will be banned for under 16-year-olds. Social media incidents involving pupils are often safeguarding concerns and should be treated as such where there are concerns of harm being caused, and staff should follow the safeguarding policy.

Further to this, where an incident relates to an inappropriate, upsetting, violent or abusive social media post by a member of the school community (e.g. parent or visitor), Woolmore will request that the post be deleted and will expect this to be actioned promptly. The police may need to be contacted if an offence is committed.

Where an offending post has been made by a third party, the school may report it to the platform it is hosted on and may contact the [Professionals' Online Safety Helpline](https://www.gov.uk/government/organisations/uk-safer-internet-centre), POSH, (run by the UK Safer Internet Centre) for support or help to accelerate this process.

CCTV

Shared areas of the school premises are covered by CCTV. The rationale for this is to;

- assist in emergency situations
- manage lockdowns
- support the application of internal policies
- support the safeguarding of pupils
- provide a sense of security for pupils and staff in school (DfE Guidance Data Protection in Schools, 2023 Updated 2026)

Footage is stored for 30 days before automatically being deleted. Access to CCTV footage is restricted to authorised personnel only and is controlled in accordance with the school's GDPR requirements.

Woolmore Primary School recognises the need to balance the use of CCTV systems for safeguarding, site security and the prevention of crime with the rights of pupils, staff and visitors to privacy and dignity. CCTV is used proportionately, lawfully and only where there is a legitimate purpose. Cameras are positioned to minimise intrusion and are not installed in areas where individuals would reasonably expect a high degree of privacy, such as toilets, changing facilities or medical treatment areas. Access to CCTV recordings is strictly controlled, recordings are retained only for as long as necessary, and all use of CCTV complies with data protection legislation and the school's CCTV and Data Protection policies.

Our CCTV policy is available to read on our website: <https://www.woolmore.towerhamlets.sch.uk/wp-content/uploads/2026/03/Woolmore-Combined-IG-Policy-with-CCTV.pdf>

<https://www.gov.uk/guidance/data-protection-in-schools/taking-and-using-photos-and-videos-and-using-cctv-in-schools>

Extremism

The school has obligations relating to radicalisation and all forms of extremism under the Prevent Duty (See Prevent Risk Assessment, 2026 https://www.woolmore.towerhamlets.sch.uk/wp-content/uploads/2026/09/Woolmore-Primary-Prevent-Risk-Assessment-2025_2026.pdf). Staff must not support or promote extremist organisations, messages or individuals, give them a voice or opportunity to visit the school, nor browse, download or send material that is considered offensive or of an extremist nature. We ask for parents' support in this also, especially relating to social media, where extremism and hate speech can be easily accessed and highly prevalent on mainstream platforms.

Data protection and cyber security

All pupils, staff, governors, volunteers, contractors and parents are bound by the school's data protection and cyber security policy/policies, which can be found here. It is important to remember that there is a close relationship between both data protection and cyber security and a school's ability to effectively safeguard children. Schools are reminded of this in KCSIE, which also refers to the DfE Standards of Cyber Security for Schools and Colleges.

Schools should remember that data protection does not prevent or limit the sharing of information for the purposes of keeping children safe.

Appropriate filtering and monitoring

The designated safeguarding lead (DSL) Hannah Williams has lead responsibility for filtering and monitoring and works closely with Clever ICT to implement the DfE filtering and monitoring standards, which require schools to:

- identify and assign roles and responsibilities to manage filtering and monitoring systems
- review filtering and monitoring provision at least annually
- block harmful and inappropriate content without unreasonably impacting teaching and learning
- have effective monitoring strategies in place that meet their safeguarding needs ([DfE Filtering and Monitoring Standards](#)).

We look to provide 'appropriate filtering and monitoring' (as outlined in Keeping Children Safe in Education) at all times ([appropriate.lgfl.net](#)). Our filtering system is called School Protect. [this is LGfL's [network filter](#). For devices that go off-site, we use HomeProtect filtering ([device filter](#)). These systems are accredited by the UK Safer Internet Centre.

The Governing Body receives at least annual assurance regarding filtering and monitoring arrangements, including the outcomes of technical reviews and safeguarding monitoring.

Staff will be reminded of the systems in place and their responsibilities at induction and start of year safeguarding, as well as via AUPs and regular training reminders in the light of the annual review and regular checks that will be carried out. We ensure all staff are aware of their responsibility in feeding back about areas of concern, potential for pupils to bypass systems and any potential over blocking. Staff can submit concerns at any point via by speaking to the DSL, and will be asked for feedback at the time of the regular checks, which will continue to take place throughout the year ([safefiltering.lgfl.net](#))

Technical and safeguarding colleagues work together closely to carry out annual reviews and check and to ensure that the school responds to issues and integrates with the curriculum.

We carry out checks throughout the year to ensure all systems are in operation, functioning as expected, etc and an annual review as part of an online safety audit of our strategy. We understand that as a request is made from a device in our school it reaches a firewall which is set up by LGfL. The firewall contains Domain Naming System (DNS) information – in the form of 2 addresses – which form the basis of our filtering system. There are 2 addresses set up as a fail-safe in case one fails.

We use templates from LGfL for this documentation (<https://safefiltering.lgfl.net>; <https://onlinesafetyaudit.lgfl.net>).

Technical and safeguarding colleagues work together closely to carry out an annual review and regular checks of filtering and monitoring, and to ensure that the school responds to issues, considers how to prevent further concerns and integrates with the curriculum (see filtering and monitoring log for examples of checks and concerns).

We carry out half-termly checks to ensure filtering is operational, functioning as expected, etc., and an annual review as part of an online safety audit of strategy, approach etc. More details of both documents and results are available on request from the DSL.

Where staff use Gen AI, they must be pre-approved by the school ([LGfL's AI Policy Toolkit](#)). For children and young people, we block all generative AI ([genaisafe.lgfl.net](#)).

Safe Search is enforced on any accessible search engines on all school-managed devices. We are aware that even with Safe Search enforced, AI is embedded in many search engine responses, and this presents risk to users in terms of misinformation, bias, hallucinations and inappropriate content.

Our YouTube mode is **'strict'**. Teacher's login setting is **moderate** if they are logged into their google account - this is to avoid over-blocking. But the default setting for children is **strict** and this is set by Domain Naming Service (DNS) with Clever ICT setting the parameters within school – it can be adjusted according to need.

The DSL checks work with Clever ICT to check filtering reports and notifications will randomly generate reports at any point in the year. The DSL will work with the Clever ICT to take any necessary action following analysis of these reports. We use the reports which are autogenerated by LGfL against the 5 parameters including Blocked Content and Top Blocked Websites. An important parameter is checking to see what websites have been allowed as this gives us an indicator of the effectiveness of the filtering system. We also do an independent check using the following website; **testfiltering.com**

According to the DfE standards, the school should have a plan for how to "monitor pupils when using school-managed devices connected to the internet. At Woolmore, we use LGfL Senso for monitoring.

According to the DfE standards, "a variety of monitoring strategies may be required to minimise safeguarding risks on internet connected devices and may include:

- physically monitoring by staff watching screens of users
- network monitoring using log files of internet traffic and web access

At Woolmore we use the above strategies to monitor the use of online devices. Staff devices are managed by Microsoft and as will all managed devices on the network we can see what websites are being searched. Additionally, devices such as school mobiles and iPads are enrolled with Meraki – which is also a management device system. Meraki would enable school devices to be located if lost and if necessary wiped remotely of all information.

If there has been a breach of the filter that has been reported, we have the capacity to generate an 'on demand' report to understand what the breach was. We will continue to work with Clever ICT to evaluate the risks of a filter breach and the need for a in the moment monitoring system.

Our checks to our filtering provision are recorded as part of our filtering and monitoring review process. When checking filtering and monitoring systems we make sure that the system setup has not changed or been deactivated. Our checks include a range of:

- school owned devices and services, including those used off site (if necessary)
- user groups, for example, teachers, pupils and guests
- a separate check of photos of students is also completed and recorded

We record the following:

- when the checks took place
- who did the check
- what they tested or checked
- resulting actions

We make sure that:

- all staff know how to report and record concerns
- filtering and monitoring systems work on new devices and services before releasing them to staff and pupils
- blocklists are reviewed and they can be modified in line with changes to safeguarding risks

With regards to staff conduct, behaviour which fulfils the criteria of a low-level concern or meets the threshold for a referral to the LADO, would trigger a response in line with our Child Protection policy and our Code of Conduct policy.

Monitoring alerts are checked daily – the notifications from SENSO are responded too in the moment and we aim to increase the effectiveness of this by ensuring all teachers have access to SENSO when their class are using devices.

Out of hours, our policies are:

- for filtering devices, no filtering reports are run or looked at during evenings, weekends or holidays
- for monitoring devices, no monitoring alerts are looked at during evenings, weekends or holidays.

Messaging/commenting systems (incl. email, learning platforms & more)

Authorised systems

- At Woolmore our aim is for there to be no platform for children to have private conversations with pupils. All staff are aware that this is our policy. If we ever chose to use a platform where private chat was an option, we would review our monitoring systems.
- Children use Google Drive in year 6 as part of their preparation for year 7. Currently the chat function is disabled.
- On Google Drive children can upload work – but the chat function has been disabled.
- Staff at this school use the email system provided by Microsoft Office for all school emails. They never use a personal/private email account (or other messaging platform) to communicate with children or parents, or to colleagues when relating to school/child data, using a non-school-administered system. Our general practise is that emails to parents are done through school admin and not from teacher's personal staff accounts.
- Staff at this school use Microsoft Teams to communicate with staff – students do not have access.

Any systems above are centrally managed and administered by the school's authorised IT partner (i.e. they can be monitored/audited/viewed centrally; are not private or linked to private accounts). This is for the mutual protection and privacy of all staff, pupils and parents, supporting safeguarding best-practice, protecting children against abuse, staff against potential allegations and in line with UK data protection legislation.

Use of any new platform or app with communication facilities or any child login or storing school/child data must be approved in advance by the school and centrally managed. At Woolmore this is the Headteacher, IT team and School Business Manager.

Any unauthorised attempt to use a different system may be a safeguarding concern or disciplinary matter and should be notified to the DSL (if by a child) or to the Headteacher (if by a staff member).

Where devices have multiple accounts for the same app, mistakes can happen, such as an email being sent from, or data being uploaded to the wrong account. If a private account is used for communication or to store data by mistake, the DSL/Headteacher/DPO (the circumstances of the incident will determine whose remit this is) should be informed immediately.

Behaviour/usage principles of messaging/commenting systems

- More detail for all the points below is given in the school's Acceptable Use Agreements and Staff Code of Conduct.
- Appropriate behaviour is expected at all times by all users, and the system should not be used to send inappropriate materials or language which is or could be construed as bullying, aggressive, rude, insulting, illegal or otherwise inappropriate, or which (for staff) might bring the school into disrepute or compromise the professionalism of staff.
- Data protection principles will be always followed when it comes to all school communications, in line with the school Data Protection Policy and only using the authorised systems mentioned above.
- Only staff are allowed to use the email system, and should be aware that all use is monitored, their emails may be read, and the same rules of appropriate behaviour always apply. Emails using inappropriate language, images, malware or to adult sites may be blocked and not arrive at their intended destination (and will be dealt with according to the appropriate policy and procedure).

Use of generative AI

At Woolmore we acknowledge that generative AI platforms (e.g. ChatGPT, Canva, Co-pilot or Gemini for the creation of new text/imagery/code/music etc) are becoming commonly used by both children and adults. We are aware of and follow the DfE's guidance on this and we follow the subsequent principles:

- The use of any Gen AI in our setting (by staff) will be carefully managed by the school to ensure that users and their data are safe.
- Staff are only permitted to use their school email account when using pre-approved Gen AI, and they must not enter data relating to children, staff or the school which is personal or sensitive.
- The school has a clear and well communicated approach to the use of any Gen AI (by staff), and this is aligned with the school's values and pedagogical approaches.
- To help users to safely use technology, we will talk about the use of these tools with staff – their practical use as well as their safety and ethical pros and cons.
- We are aware that there will be use of these apps and exposure to Gen AI creations on devices at home for many pupils – these experiences may be both positive/creative and also negative (e.g. data breaches, misinformation, bullying, deepfakes, creation of deepfake intimate imagery and chatbots that encourage unhealthy and inappropriate relationships). Therefore, it is important as a school that we support pupils in developing digital literacy skills to help mitigate these risks. In school whilst we do not allow children to use AI tools, we are using the DfE's guidance to help guide us in the evolution of the curriculum. We understand that this is a complex area and that supporting our children to use it safely and with integrity may be part of what we teach in the future. School is a safe place to discuss things such as AI with our children as we acknowledge it is more a part of everyday life and news. This will remain on our schedule of staff CPD.
- In school, Staff are not blocked from using AI tools to support with planning, preparation or assessment. Staff are supported in making informed choices with regard using AI. Staff are aware that their responsibility is to ensure that the information they input into an AI platform would need to be thought about carefully and comply fully with our GDPR policy. Staff know that putting any personal information in regarding students would not be compliant and would be a breach of this policy, the code of conduct policy and the safeguarding policy. For children we will take a risk-based approach – BLOCK the generative AI category on the filtering system, and if and when appropriate to allow gen AI, we will do so on a one-by-one basis for those sites/apps you deem to be acceptable/required, with limitations according to age or perhaps only for certain lessons. We are aware that staff users already access AI e.g. Arbour, Co-Pilot, learning resources and Google search etc.

- Approving the use of a new platform is the responsibility of Clever ICT – staff understand that downloading any applications is forbidden and should be prevented by the IT systems. DfE Generative AI Product Safety Standards.
- When using AI notetakers we consider the risks as outlined in the LGfL document <https://viewonline.lgfl.net/hubfs/SafeguardED/AI%20notetakers%20safeguarding%20guidance.pdf> We will be looking to increase our expertise in DPIA when using tools such as these in school. At the time of writing this policy we are also creating our first AI policy for school and staff CPD, messaging to parents and curriculum evaluation for children will be part of the work we do on online safety this academic year. In this way we hope to ensure our children are taught the necessary skills to effectively use AI in an age-appropriate way.

Online storage or learning platforms

All the principles outlined above also apply to any system to which you log in online to conduct school business, whether it is to simply to store files or data (an online 'drive') or collaborate, learn, teach, etc. In Woolmore this includes Microsoft Office and Teams.

For all these, it is important to consider data protection and cyber security before always adopting such a platform or service and when using it. Any new platforms will be approved by Clever ICT, DSL, SBM and the headteacher. Please also see our Cyber Security Policy and Data Protection Policy for more information on password hygiene, cyber security and data protection best practice, privacy statements, collaboration with your DPO, file sharing permissions and procedures, use of two-factor authentication, parental permissions, where pupil work can be displayed, the differences between consumer and education products (e.g. a private Gmail account or Google Drive and those belonging to a managed educational domain).

School website

The school website is a key public-facing information portal for the school community (both existing and prospective stakeholders) with a key reputational value. The Headteachers and Governors have largely delegated some of the day-to-day responsibility of updating the content of the website and ensuring compliance with DfE stipulations to SLT and the SBM although the Headteachers are responsible for some website content.

The school website is a key public-facing information portal for the school community (both existing and prospective stakeholders) with a key reputational value. The Headteacher and Governors have delegated the day-to-day responsibility of updating the content of the website and ensuring compliance with DfE stipulations to the Headteacher.

Where staff submit information for the website, they are asked to remember that schools have the same duty as any person or organisation to respect and uphold copyright law – schools have been fined thousands of pounds for copyright breaches. Sources must always be credited, and material only used with permission. There are many open-access libraries of public-domain images/sounds etc that can be used. Finding something on Google or YouTube does not mean that copyright has been respected. If in doubt, check with the Headteacher and DSL.

Digital images and video

We are aware that in light of image manipulation by Gen AI platforms to create sexual imagery of children and adults, the UK Online Harms Early Warning Working Group published guidance in May 2026 stating that schools should reconsider publishing pupil and staff images on websites/social media <https://d1xsi6mgo67kia.cloudfront.net/uploads/2026/06/Protecting-your-settings-images-from-AI-manipulation-and-abuse.pdf>

Considering this we are currently reviewing the content on our website and our school's presence on social media (September 2026). We particularly want to pay attention to practices to protect young people's images:

- Ensuring images do not contain identifiable information that could be used to harm or blackmail an individual (e.g. full names or faces).
- Using imagery that is harder to misuse or abuse, this could be by only sharing photos taken from a distance, blurred images or images taken from over the shoulder.
- Applying privacy settings to help limit who can view and share content (this can be done on social media or any other place the images are stored or shared).
- Removing metadata (e.g. EXIF data) from the images that may reveal location, device details or timestamps.
- Such data can unintentionally reveal schedules or routines, for example of regular training
- Embedding image security awareness and practices in staff training and policies.

What to do if images of young people are misused, altered or abused

If an incident occurs, it is important to take the following steps:

Contain & Escalate

- Do not delete or further share any communication or criminal images relating to the incident.
- Retain and store securely and seek advice from your local police force.
- Immediately ensure the original version of the compromised images are no longer publicly available, including on websites or social media.
- Notify your school or organisation's Designated Safeguarding Lead/Person or a senior colleague.
- Record details of the breach in line with your standard incident reporting processes, including carrying out a risk assessment of the impact on individuals and taking any notification actions as required.
- If you have been approached with demands by someone attempting to blackmail your setting, it is important that you do not engage with the individual or respond to any of the demands. The paying of ransom can be illegal in certain circumstances.

Report

- Police: Report to your local police force if you have received threats to publish sexual imagery of children or young people in your educational setting. The creation of child sexual abuse material is illegal regardless of whether it is AI generated or not. If a young person is at immediate risk of significant harm, call 999.
- Report Remove (Childline/IWF): Support under-18s to use the confidential 'Report Remove' tool to report sexual images or videos of themselves, including if they are created by AI, to see if they can be removed from the internet.
- Take It Down: An image take down service, including for AI-generated images, offered by the National Center for Missing and Exploited Children (NCMEC).
- Stop NCII: Use 'Stop NCII' for the removal of non-consensual intimate images of over-18s, whether pupils or staff, including if these images are generated by AI.

Platform reporting

- Request removal from hosting sites/social media where the images have been shared.

Support

- Prioritise student safety and wellbeing.
- Inform parents and carers with clear next steps.
- Exposure to illegal material involving children, and responding to concerns while supporting affected families, can be extremely distressing for the staff involved. It is therefore important that affected staff are made aware of the wellbeing support available to them through their employment or external helplines. Professionals, parents and carers can also seek support and advice via the Stop It Now helpline or the Professionals Online Safety Helpline.

Prevent Recurrence

- Audit imagery on school websites/platforms and tighten consent processes.
- Update policies and staff training.
- Consider protective software (e.g. watermarking, metadata scrubbing).

When a pupil joins the school, parents/carers are asked if they give consent for their child's image to be captured in photographs or videos, for what purpose (beyond internal assessment, which does not require express consent), and for how long.

Whenever a photo or video is taken/made, the member of staff taking it will check the latest database before using it for any purpose.

All staff are governed by their contract of employment and the school's Acceptable Use Policy, which covers the use of mobile phones/personal equipment for taking pictures of pupils, and where these are stored. At Woolmore, with SLT permission members of staff may on rare occasions use personal phones to capture photos or videos of pupils, but these will be appropriate, linked to school activities, taken without secrecy and not in a one-to-one situation, and always moved to school storage as soon as possible, after which they are deleted from personal devices or cloud services (NB – many phones automatically back up photos). We are currently purchasing school phones so that this guidance will be amended and no staff will use personal phones for this reason (see Mobile Phone Policy, 2026)

Photos are stored in shared files on the school cloud and in line with the retention schedule of the school's Data Protection Policy. Staff are asked to store photos of pupils in one file specifically allocated for photos. Storage of photos in this way must also comply with the retention schedule of the school Data Protection Policy. AHTs, DSL and Clever ICT are responsible for checking images/video on all school devices throughout the year. Devices are subject to random check by SLT. Any concerns about the nature of these images will be reported to the DSL

Parents must **not** covertly film or record any interactions with pupils or adults in schools or near the school gates, nor share images of other people's children on social media, as there may be cultural or legal reasons why this would be inappropriate or even dangerous (see nofilming.lgfl.net for more information). Further information on managing pupil image and video content is available [here](#).

We encourage parents and children to think about their online reputation and digital footprint, and role model not oversharing on social media (or providing embarrassment in later life, and it is not for us to judge what is embarrassing or not).

Pupils are taught about how images can be used and manipulated in their online safety education programme and taught to consider how to publish for a wide range of audiences, which might include governors, parents or younger children.

Social media

Our SM presence

Woolmore works on the principle that if we don't manage our social media reputation, someone else will.

Online Reputation Management (ORM) is about understanding and managing our digital footprint (everything that can be seen or read about the school online). Few parents will apply for a school place without first Googling the school, and the Ofsted pre-inspection check includes monitoring what is being said online.

Accordingly, we manage and monitor our social media footprint carefully to know what is being said about the school and to respond to criticism and praise in a fair, responsible manner. We conduct regular checks of privacy and security settings on social media accounts to ensure appropriate access.

The headteachers, SLT, SBM and Clever ICT are responsible for managing our X-Twitter and checking our Wikipedia and Google reviews and other mentions online.

Staff, pupils' and parents' social media presence

As of June 2026, the UK Government has announced that social media will be banned for under 16-year-olds. Therefore, schools are encouraged to start preparations for this.

Social media is a fact of modern life, and as a school, we accept that many parents, staff and pupils will use it. However, as stated in the acceptable use policies, we expect everybody to behave in a positive manner, engaging respectfully with the school and each other on social media, in the same way as they would face to face.

This positive behaviour can be summarised as not making any posts which are or could be construed as bullying, aggressive, rude, insulting, illegal or otherwise inappropriate, or which might bring the school or (particularly for staff) teaching profession into disrepute. This applies both to public pages and to private posts, e.g. parent chats, pages or groups.

If parents have a concern about the school, we urge them to contact us directly and in private to resolve the matter. If an issue cannot be resolved in this way, the school complaints procedure should be followed. Sharing complaints on social media is unlikely to help resolve the matter, but can cause upset to staff, pupils and parents, also undermining staff morale and the reputation of the school (which is important for the pupils we serve).

Many social media platforms have a minimum age of 13 but the school occasionally deals with issues arising on social media involving pupils under the age of 13. We ask parents to respect age ratings on social media platforms wherever possible and not encourage or condone underage use. Children under 13 years can use WhatsApp, only if they have a Parent-Managed Account. As part of our planned parent workshops we will share this information.

However, the school must strike a difficult balance of not encouraging underage use at the same time as needing to acknowledge reality to best help our pupils to avoid or cope with issues if they arise. Online safety lessons will explore online behaviour, how to be a good friend online and how to report bullying, misuse, intimidation or abuse. However, children will often learn most from the models of behaviour they see and experience, which will often be from adults.

Parents can best support this by talking to their children about the apps, sites and games they use, with whom, for how long, and when (late at night / in bedrooms is not helpful for a good night's sleep and productive teaching and learning at school the next day). You may wish to refer to the Digital Family Agreement to help establish shared expectations and the Top Tips for Parents poster along with relevant

items and support available from parentonlinesafety.lgfl.net and parentsafe.lgfl.net and introduce the Children's Commission Digital 5 A Day.

Although the school has an official X-Twitter it asks parents/carers not to use these channels, especially not to communicate about their children.

As outlined in the Acceptable Use Policies, pupils are not allowed* to be 'friends' with or make a friend request** to any staff, governors, volunteers and contractors or otherwise communicate via social media. This includes any staff who may consider themselves to be online influencers.

Pupils are discouraged from 'following' staff, governor, volunteer or contractor public accounts (e.g. following a staff member with a public Instagram account) as laid out in the AUPs. However, we accept that this can be hard to control (but this highlights the need for staff to remain professional in their private lives). In the reverse situation, however, staff must not follow such public pupil accounts.

** Exceptions may be made, e.g. for pre-existing family links, but these must be approved by the Headteacher/ and should be declared upon entry of the pupil or staff member to the school).*

*** Any attempt to do so may be a safeguarding concern or disciplinary matter and should be notified to the DSL (if by a child) or to the Headteacher (if by a staff member).*

Staff are reminded that they are obliged not to bring the school or profession into disrepute and the easiest way to avoid this is to have the strictest privacy settings and avoid inappropriate sharing and oversharing online. They should never discuss the school or its stakeholders on social media and be careful that their personal opinions might not be attributed to the school, trust or local authority, bringing the school into disrepute

See the previous section on image sharing.

Device usage

AUPs remind those with access to school devices about rules on the misuse of school technology – devices used at home should be used just like if they were in full view of a teacher or colleague. Please read the following in conjunction with those AUPs and the sections of this document that impact upon device usage, e.g. copyright, data protection, social media, misuse of technology, and digital images and video.

Personal devices including wearable technology and bring your own device (BYOD)

Pupils

- Our approach to pupils using mobile phones is in line with the [DfE Guidance](#) . Any contravention of this will lead to sanctions (see Mobile Phone policy, 2026).
- Stored mobiles will be turned off for the duration of the day.
- Important messages and phone calls to or from parents can be made at the school office, which will also pass on messages from parents to pupils in emergencies.
- Personal recording devices, such as smart glasses, are not permitted in school without written permission. It is forbidden to take secret photos, videos or recordings of teachers or pupils, including remotely, with any device.

All staff who work directly with children

- They should keep their mobile phones on silent and only use them in private staff areas during school hours. If a staff member is expecting an important personal call when teaching or otherwise

on duty, they may leave their phone with the school office to answer on their behalf or ask for the message to be left with the school office.

- See also the 'Digital images and video' section of this document and the school data protection cyber security policies. Child/staff data should never be downloaded onto a private phone.
- Other personal recording devices such as smart glasses are not permitted in school without written permission. It is forbidden to take secret photos, videos or recordings of teachers or pupils, including remotely, with any device.
- There are exceptions when children use mobile devices to support with medical conditions such as diabetes. The school works with families to ensure that these devices are restricted and therefore pose no risk in terms of online access or their capabilities as a camera.

Volunteers, contractors, and governors

- They should leave their phones in their pockets and turned off. Under no circumstances should they be used in the presence of children or to take photographs or videos. If this is required (e.g. for contractors to take photos of equipment or buildings), permission of the headteacher should be sought (the headteacher may choose to delegate this) and this should be done in the presence of a member of staff.
- Other personal recording devices, such as smart glasses are not permitted in school without written permission. It is forbidden to take secret photos, videos or recordings of teachers or pupils, including remotely, with any device.

Parents

- They should ask permission before taking any photos, e.g. of displays in corridors or classrooms, and avoid capturing other children. Please see the Digital images and video section of this document for more information about filming and photography at school events.
- Parents are asked not to call pupils on their mobile phones during the school day; urgent messages can be passed via the school office.
- We do not allow Apple AirTags or similar devices in school. Please note that it is against the terms and conditions of these products to use them to track a child.
- It is forbidden to take secret photos, videos or recordings of teachers or pupils, including remotely, with any device. Other personal recording devices such as smart glasses are not permitted in school without written permission.

Use of school devices

School devices are not to be used in any way which contravenes AUPs, Behaviour Policy / Staff Code of Conduct.

Wi-Fi is accessible to visitors for school-related internet use within the framework of the acceptable use policy. All such use is monitored.

School devices for staff or pupils are restricted to the apps/software installed by the school, whether for use at home or school, and may be used for learning and reasonable as well as appropriate personal use. Staff and pupils are not permitted to use Virtual Private Networks (VPNs) on the school network or make any other attempts to bypass the school's filtering. Our filtering is set up to block all use of Virtual Private Networks (VPNs) on school owned devices and across the network.

Users should know that all and any usage of school owned devices, systems and platforms may be tracked.

Trips / events away from school

For school trips/events away from school, teachers will be issued a school duty phone, and this number will be used for any authorised or emergency communications with pupils and parents. Any deviation from this policy (e.g. by mistake or because the school phone will not work) will be reported immediately to the Headteacher. Teachers using their personal phone in an emergency will ensure the number is hidden to avoid a parent or pupil accessing a teacher's private phone number.

If on trips, pupils are encouraged to connect to another organisation's Wi-Fi/network, staff must be aware that other connections may not be as well controlled (e.g. via filtering and monitoring) as the network and systems in school. Therefore, staff are responsible for risk assessing and managing such situations and should seek advice from the DSL where necessary.

Parents will be reminded about their child's permitted device use whilst on trips away from school including that tracking devices such as Airtags are not permitted for the safety of all pupils.

Searching and confiscation

In line with the DfE guidance '[Searching, screening and confiscation: advice for schools](#)', the Headteachers and staff authorised by them have a statutory power to search pupils/property on school premises. This includes the content of mobile phones and other devices, for example, because of a reasonable suspicion that a device contains illegal or undesirable material, including but not exclusive to sexual images, pornography, violence or bullying.

Full details of the school's search procedures are available in the school's Child Protection Policy.

Appendix A – Roles

Please read the relevant roles & responsibilities section from the following pages.

All school staff must read the “All Staff” section as well as any other relevant to specialist roles.

Roles:

- All Staff
- Headteacher/Principal
- Designated Safeguarding Lead
- Governing Body, led by Online Safety / Safeguarding Link Governor
- PSHE / RSHE Lead/s
- Computing Lead
- Subject / aspect leaders
- Network Manager/technician
- Data Protection Officer (DPO)
- Volunteers and contractors (including tutor)
- Pupils
- Parents/carers
- External groups, including parent associations

All staff

All staff should sign and follow the staff Acceptable Use Policy in conjunction with this policy, the school's main Safeguarding Policy, the Code of Conduct and relevant parts of Keeping Children Safe in Education to support a whole-school safeguarding approach.

They must report any concerns, no matter how small, to the Designated Safeguarding Lead as named in the AUP, maintaining an awareness of current online safety issues (see the start of this document for issues) and guidance (such as KCSIE), modelling safe, responsible and professional behaviours in their own use of technology at school and beyond and avoiding scaring, victim-blaming language.

Staff should also be aware of the DfE standards for filtering and monitoring and play their part in feeding back to the DSL about over blocking, gaps in provision or pupils bypassing protections. All staff are also responsible for physically monitoring pupils' online devices during any session/class they are working in.

Interim Co-Headteachers – Jen Harris and Hannah Williams

Key responsibilities:

- Foster a culture of safeguarding where online safety is fully integrated into whole-school safeguarding.
- Oversee and support the activities of the designated safeguarding lead team and ensure they work with technical colleagues to complete an online safety audit in line with KCSIE (including technology in use in the school (onlinesafetyaudit.lgfl.net)).
- Undertake training in offline and online safeguarding, in accordance with statutory guidance and Local Safeguarding Children Partnership support and guidance.
- Ensure the school implements and makes effective use of appropriate ICT systems and services, including school-safe filtering and monitoring, protected email systems and that all technology including remote systems are implemented according to child-safety first principles.
- Better understand, review and drive the rationale behind decisions in filtering and monitoring as per the DfE standards—through regular liaison with technical colleagues and the DSL— in particular, understand what is blocked or allowed for whom, when, and how as per KCSIE. [LGfL's Web Filtering for DSLs and SLT](#) self-service webinar, provides an overview.
- Liaise with the Designated Safeguarding Lead on all online safety issues which might arise and receive regular updates on school issues and broader policy and practice information.
- Support safeguarding leads and technical staff as they review protections for pupils in the home and remote-learning procedures, rules and safeguards (see remotesafe.lgfl.net).
- Take overall responsibility for data management and information security, ensuring the school's provision follows best practice in information handling; work with the DPO, DSL and governors to ensure a compliant framework for storing data, but helping to ensure that child protection is always put first and data-protection processes support careful and legal sharing of information.
- Understand and make all staff aware of procedures to be followed in the event of a serious online safeguarding incident.
- Ensure suitable risk assessments are undertaken so the curriculum meets the needs of pupils, including risk of children being radicalised.
- Ensure the school website meets statutory requirements (websiterag.lgfl.net)

Designated Safeguarding Lead – Hannah Williams

Key responsibilities (remember the DSL can delegate certain online safety duties but not the overall responsibility; this assertion and all quotes below are from Keeping Children Safe in Education):

- The DSL should “take **lead responsibility** for safeguarding and child protection (**including online safety and understanding the filtering and monitoring** systems and processes in place).
- Ensure “An effective whole school approach to online safety as per KCSIE.
- Ensure the school is complying with the DfE's standards on Filtering and Monitoring. ([LGfL's Web Filtering for DSLs and SLT](#); safefiltering.lgfl.net and appropriate.lgfl.net).
- As part of this, DSLs will work with technical teams to carry out an annual review and regular checks on filtering and monitoring to compile the relevant documentation and ensure that safeguarding and technology work together. This will include a decision on relevant YouTube mode and preferred search engine/s etc.
- Where online safety duties are delegated and in areas of the curriculum where the DSL is not directly responsible, but which cover areas of online safety (e.g. RSHE / HRE at Woolmore), ensure there is regular review and open communication, and that the DSL's clear overarching responsibility for online safety is not compromised or messaging to pupils is confused.

- Ensure ALL staff and supply staff undergo safeguarding and child protection training (including online safety) at induction and that this is updated annually.
 - This must include filtering and monitoring and help them to understand their roles.
 - All staff must read and understand KCSIE Part 1 - translations are available in 13 community languages at kcsietranslate.lgfl.net
 - Cascade knowledge of risks and opportunities throughout the organisation.
- Ensure that ALL governors undergo safeguarding and child protection training (including online safety) at induction to enable them to provide strategic challenge and oversight into policy and practice and that this is regularly updated. LGfL's Safeguarding Training for school governors is free to all governors at safetraining.lgfl.net.
- Take day-to-day responsibility for safeguarding issues and be aware of the potential for serious child protection concerns.
- Be mindful of using appropriate language and terminology around children when managing concerns, including avoiding victim-blaming language (spotlight.lgfl.net - CPD resource to use with staff and saferesources.lgfl.net for further support).
- Remind staff of safeguarding considerations as part of a review of remote learning procedures and technology, including that the same principles of online safety and behaviour apply.
- Work closely with SLT, staff and technical colleagues to complete an online safety audit (including technology in use in the school – onlinesafetyaudit.lgfl.net).
- Work with the headteacher, DPO and governors to ensure a compliant framework for storing data but helping to ensure that child protection is always put first, and data-protection processes support careful and legal sharing of information.
- Stay up to date with the latest trends in online safeguarding - safetraining.lgfl.net ; prevent.lgfl.net.
- Review and update this policy, other online safety documents (e.g. Acceptable Use Policies) and the strategy on which they are based (in harmony with policies for behaviour, safeguarding, Prevent and others) and submit for review to the governors.
- Receive regular updates about online safety issues and legislation, be aware of local and school trends including signing up to [LGfL safeguarding newsletter](#)
- Ensure that online safety education is embedded across the curriculum in line with the statutory RSHE guidance (e.g. by use of the updated UKCIS framework '[Education for a Connected World – 2020 edition](#)') and beyond, in wider school life.
- Promote awareness of and commitment to online safety throughout the school community, with a strong focus on parents, including hard-to-reach parents using amongst others dedicated resources at parentonlinesafety and parentsafe.lgfl.net.
- Communicate regularly with SLT and the safeguarding governor/committee to discuss current issues (anonymised), review incident logs and filtering/change control logs and discuss how filtering and monitoring work and have been functioning/helping.
- Ensure all staff are aware of the procedures that need to be followed in the event of an online safety incident, and that these are logged in the same way as any other safeguarding incident.
- Ensure adequate provision for staff to flag issues when not in school and for pupils to disclose issues when off-site, especially when in isolation/quarantine, e.g. a [survey to facilitate disclosures](#) and an online form on the school home page about 'something that's worrying me' that gets mailed securely to the DSL inbox.
- Ensure staff adopt a zero-tolerance, whole school approach to all forms of child-on-child abuse, and don't dismiss it as banter (including bullying).
- Pay particular attention to **online tutors**, both those engaged by the school as part of the DfE scheme who can be asked to sign the contractor AUP, see the template at safepolicies.lgfl.net with provisions and those hired by parents ([the Online Tutors – Keeping Children Safe](#) poster at parentsafe.lgfl.net to remind parents of key safeguarding principles.

Governing Body, led by Online Safety / Safeguarding Link Governor – Christine Frost and Dale Mendez

Key responsibilities (quotes are taken from Keeping Children Safe in Education)

- Approve this policy and strategy and subsequently review its effectiveness, e.g. by asking the questions in the helpful document from the UK Council for Child Internet Safety (UKCIS) [Online safety in schools and colleges: Questions from the Governing Board](#) .
- Undergo (and signpost all other governors to attend) safeguarding and child protection training (including online safety) at induction to provide strategic challenge and into policy and practice, ensuring this is regularly updated.
- Ensure that all staff also receive appropriate safeguarding and child protection (including online) training at induction and that this is updated annually.
- Appoint a filtering and monitoring governor to work closely with the DSL on the new filtering and monitoring standards there is guidance for governors at [safefiltering.lgfl.net](#).
- Support the school in encouraging parents and the wider community to become engaged in online safety activities.
- Have regular strategic reviews with the online safety coordinator / DSL and incorporate online safety into standing discussions of safeguarding at governor meetings.
- Governing bodies should ensure their school or college has appropriate filtering and monitoring systems in place and regularly review their effectiveness at least once every academic year (see [onlinesafetyaudit.lgfl.net](#) for template).
- Read all KCSIE to ensure all governors understand their safeguarding responsibilities.
- Work with the DPO, DSL and headteacher to ensure a compliant framework for storing data, helping to ensure that child protection is always put first, and data-protection processes support careful and legal sharing of information.
- Ensure all school staff have read Part 1 of KCSIE – governors are recommended to read ALL KCSIE to ensure they fully understand their safeguarding responsibilities.
- Ensure that all staff undergo safeguarding and child protection training (including online safety and now also reminders about filtering and monitoring).
- "Ensure that children are taught about safeguarding, including online safety [...] as part of providing a broad and balanced curriculum [...] Consider a whole school or college approach to online safety [with] a clear policy on the use of mobile technology." (Teaching Online Safety in Schools; UKCIS cross-curricular framework 'Education for a Connected World – 2020 edition).

PSHE / HRE (RSHE) Lead/s – Gemma Purdy and Michael Johnston

Key responsibilities:

- As listed in the 'all staff' section, plus:
- Embed statutory [RSHE Guidance](#), including consent, mental wellbeing, healthy relationships and staying safe online, as well as raising awareness of the risks and challenges from the latest trends in generative artificial intelligence, financial extortion and sharing intimate pictures online, into the PSHE / Relationships education and health education curriculum. "This will include being taught what positive, healthy and respectful online relationships look like, the effects of their online actions on others and knowing how to recognise and display respectful behaviour online. Throughout these subjects, teachers will address online safety and appropriate behaviour in an age-appropriate way that is relevant to their pupils' lives."

- Focus on the underpinning knowledge and behaviours outlined in Teaching Online Safety in Schools, in an age-appropriate way to help pupils navigate the online world safely and confidently regardless of their device, platform or app.
- Assess teaching to “identify where pupils need extra support or intervention [through] tests, written assignments or self-evaluations, to capture progress” – (see LGfL's SafeSkills Online Safety Quiz and diagnostic teaching tool at safeskillsinfo.lgfl.net to complement the computing curriculum.
- Work closely with the DSL and all other staff to ensure understanding of the issues, approaches, and messaging within PSHE / RSHE.
- Develop and implement a HRE (RSHE) policy and publish this on the school website.
- Work closely with the Computing subject leader to avoid overlap but ensure a complementary whole-school approach, and with all other lead staff to embed the same whole-school approach.

Computing Lead – Hodan Mohamed

Key responsibilities:

- As listed in the 'all staff' section, plus:
- Oversee the delivery of the online safety element of the Computing curriculum in accordance with the national curriculum.
- Work closely with the RSHE lead to avoid overlap but ensure a complementary whole-school approach.
- Work closely with the DSL and all other staff to ensure understanding of the issues, approaches, and messaging within Computing.
- Collaborate with technical staff and others responsible for ICT use in school to ensure a common and consistent approach, in line with acceptable-use agreements.

Subject / aspect leaders

Key responsibilities:

- As listed in the 'all staff' section, plus:
- Look for opportunities to embed online safety in your subject or aspect, especially as part of the RSHE curriculum, and model positive attitudes and approaches to staff and pupils alike.
- Consider how the UKCIS framework 'Education for a Connected World' and 'Teaching Online Safety in Schools' can be applied in your context.
- Work closely with the DSL and all other staff to ensure an understanding of the issues, approaches and messaging within Computing.
- Ensure subject-specific action plans also have an online safety element.

Network Manager/other technical support roles – Clever ICT

Key responsibilities:

- As listed in the 'all staff' section, plus:
- Collaborate regularly with the DSL and leadership team to help them make key strategic decisions around the safeguarding elements of technology.

- Support safeguarding teams to understand and manage filtering and monitoring systems and carry out regular reviews and annual checks e.g. schoolprotect.lgfl.net and monitoring.lgfl.net. There is a free template available for filtering checks here - safefiltering.lgfl.net.
- Support DSLs and SLT to carry out an annual online safety audit as recommended in KCSIE. Use LGfL template at <https://onlinesafetyaudit.lgfl.net>. This should also include a review of technology, including filtering and monitoring systems (what is allowed, blocked and why and how 'over blocking' is avoided as per KCSIE) to support their role as per the DfE standards, we recommend you signpost them to [LGfL's Web Filtering for DSLs and SLT self-service webinar](#), provides a quick overview to help build their understanding, protections for pupils in the home see [LGfL HomeProtect filtering for the home](#) – <https://homeprotect.lgfl.net> and remote-learning see remotesafe.lgfl.net for guidance.
- Keep up to date with the school's online safety policy and technical information to effectively carry out their online safety role and to inform and update others as relevant.
- Work closely with the designated safeguarding lead / online safety lead / data protection officer / LGfL nominated contact / HRE (RSHE) lead to ensure that school systems and networks reflect school policy and there are no conflicts between educational messages and practice.
- Ensure the above stakeholders understand the consequences of existing services and any changes to these systems (especially access to personal and sensitive records / data and to systems such as YouTube mode, web filtering settings, sharing permissions for files on cloud platforms etc.
- Ensure filtering and monitoring systems work on new devices and services before releasing them to pupils and staff.
- Maintain up-to-date documentation of the school's online security and technical procedures.
- To report online safety related issues that come to their attention in line with school policy.
- Manage the school's systems, networks and devices according to a strict password policy, with systems in place for detection of misuse and malicious attack, with adequate protection, encryption and backup for data, including disaster recovery plans, and auditable access controls.
- Ensure the data protection policy and cyber security policy are up to date, easy to follow and practicable. At LGfL schools you need to ensure that you take advantage of the following solutions which are part of your package: Sophos Phish Threat, Sophos Intercept X Advanced, Sophos Intercept X Advanced for Server, ThreatDown Incident Response, Egress, GridStore and Meraki Mobile Device Management. These solutions which are part of your package will help protect the network and users on it.
- Alongside the DSL, Computing Lead and SBM Monitor the use of school technology, online platforms and social media presence and ensure that any misuse/attempted misuse is identified and reported in line with school policy.
- Work with the Headteacher to ensure the school website meets statutory DfE requirements

Data Protection Officer (DPO) – Jonathan Verity SBM / Judicium / Louise Manthorpe

Key responsibilities:

- Alongside those of other staff, provide data protection expertise and training and support the DP and cyber security policy and compliance with those and legislation and ensure that the policies conform with each other and with this policy.
- Not to prevent or limit the sharing of information for the purposes of keeping children safe. As outlined in *Data protection in schools, 2023*, "It's not usually necessary to ask for consent to share personal information for the purposes of safeguarding a child." And in KCSIE, "Data protection laws do not prevent the sharing of information for the purposes of keeping children safe and promoting their welfare."

- Note that retention schedules for safeguarding records may be required to be set as 'Very long-term need (until pupil is aged 25 or older)'. However, some local authorities require record retention until the age of 25 for all pupil records. You should check the requirements in your area.
- Ensure that all access to safeguarding data is limited as appropriate and monitored and audited.

Volunteers and contractors (including tutor)

Key responsibilities:

- Read, understand, sign and adhere to an Acceptable Use Policy (AUP)
- Report any concerns, no matter how small, to the Designated Safeguarding Lead.
- Maintain an awareness of current online safety issues and guidance.
- Model safe, responsible and professional behaviours in their own use of technology at school and as part of remote teaching or any online communications.
- Note that as per the AUP agreement, a contractor will never attempt to arrange any meeting, **including a tutoring session**, without the full prior knowledge and approval from the school, and will never do so directly with a pupil. The same applies to any private/direct communication with a pupil.

Pupils

Key responsibilities:

Read, understand, sign and adhere to the pupil Acceptable Use Policy.

Parents/carers

Key responsibilities:

- Read, sign and adhere to the school's parental Acceptable Use Policy (AUP), read the pupil AUP and encourage their children to follow it.

External groups (e.g. those hiring the premises) including parent associations

Key responsibilities:

- Any external individual/organisation will sign an acceptable use policy prior to using technology or the internet within the school.
- Support the school in promoting online safety and data protection.
- Model safe, responsible, respectful and positive behaviours in their own use of technology, including on social media: not sharing others' images or details without permission and refraining from posting negative, threatening or violent comments about others, including the school staff, volunteers, governors, contractors, pupils or other parents/carers.

Appendix B: The National Landscape of Online Safety

Nationally, some of the latest trends of the past twelve months are outlined below. These are reflected in this policy and the acceptable use agreements we use and see in the context of the 4 Cs (see KCSIE for more details).

National Online Safeguarding Trends

Please review the information below and consider the extent to which your policies, procedures, systems and practices address these issues in school. It may be helpful to consider how to incorporate reflections and identification of actions in your online safety audit.

1. LGfL SENSO MONITORING

The following are concerns highlighted through LGfL's partnership with Senso and monitoring data from LGfL schools. Many children are using Gen AI platforms on the school network and/or school devices, and the following have occurred:

- The creation of child sexual abuse material by and of children
- The spread of AI generated hoaxes, misinformation and disinformation. Sometimes these can be so realistic that it is difficult to determine what is true or not. One notable example of this was the sharing of fake information across social media about serious threats of violence in and between schools, which led to children/parents being fearful and some not attending school.
- Children turning to Gen AI platforms for advice – some of which is harmful and extremely worrying, e.g. dieting, relationships, bullying, and advice about self-harm
- Increased use of AI companions and chatbots which mimic human connection and have been seen to lead to AI induced psychosis, overuse, and heightened feelings of loneliness and shame. Tragically, there have also been numerous cases worldwide of children dying by suicide because of interactions with such bots.

There have also been numerous concerns related to staff use of Gen AI, including privacy and intellectual property breaches, and an increase in poor quality learning resources created using Gen AI.

Schools must address this, not just in the classroom, but by educating staff, governors, trustees, parents and pupils on safe use of digital technology, both for school and personal use. For guidance and resources, visit genai.lgfl.net.

LGfL Senso monitoring data has also revealed other concerns in schools:

- Children accessing inappropriate online games, dating sites and web chat where there is the risk of seeing adult and violent content and having interactions with strangers.
- The normalisation of violent and racist language between children, much of which doesn't suggest a particular ideology, but which could lead to extremism.

All these issues require a whole school approach to online safeguarding, as there is no quick or simple solution. It requires a combination of strong leadership, clear roles and responsibilities, robust policies and procedures, effective technical systems, highly competent staff who are regularly updated on this fast-paced world, effective and regular collaboration with parents, successful digital literacy and online safety teaching and more.

2. OFCOM'S LATEST RESEARCH

Ofcom's '[Children and Parents media use and attitudes report](#)' published in 2026 has shown the following:

Internet use is nearly universal, with 99% of 8-17-year-olds going online, and the vast majority of children are using digital technology by the time they start primary school. A critical transition occurs at age 11, where personal mobile phone ownership jumps from 56% to 83%. Schools must also address the rapid adoption of Generative AI, now used by 56% of 8-17-year-olds, primarily for schoolwork (51%). Despite high confidence, a 'digital literacy gap' exists: 31% of students could not identify a fake social media profile, and 46% believe AI search summaries are "always accurate".

Social pressures remain high, with 70% of students feeling pressure to be popular on social apps. Negative experiences are common; 23% of 8-17-year-olds personally experienced "nasty or hurtful" behaviour in the last year, occurring most frequently on social media (47%) and in online games (38%). Vulnerable students, such as those with mental health conditions, are significantly more likely to feel their screen time is "too high" (56%).

Schools are the primary source of online safety information for 49% of parents. While 85% of students recall online safety lessons, only 23% remember being taught how to spot AI-generated content, and 21% recall lessons on identifying advertising. This suggests a need for updated curricula that reflect the evolving risks of AI and commercial influence.

3. IWF, CSAM CONCERNS

Data from the IWF in their 2025 [annual report](#) highlights the scale of child sexual abuse imagery online. In 2025, the IWF assessed 451,210 reports, confirming that 311,610 contained child sexual abuse material (CSAM).

Schools should be specifically alerted to emerging and persistent harms identified by the IWF, which include:

- Sexually coerced extortion (sextortion): Targeted threats against students – teenage boys in particular.
- AI-generated abuse: The use of generative tools to create non-consensual sexual imagery.
- Violence against women and girls (VAWG): A growing trend in digital spaces around violent and misogynistic narratives and language.

4. "COM NETWORKS"

A further concern highlighted by the [National Crime Agency](#), is that of the existence of 'Com Networks'. These are networks of predominantly teenage boys, dedicated to inflicting harm and committing a range of criminality both on and offline, including cyber, fraud, extremism, serious violence, and child sexual abuse. The victims of these crimes are typically other children, some as young as 11, who have been coerced into seriously harming or sexually abusing themselves, siblings or pets. These networks are not hidden away in the dark web, but instead on platforms such as Discord, Telegram, Roblox, and Minecraft. Schools can help to protect children from these networks by enforcing effective filtering, training staff to recognise signs of exploitation, supporting parents to understand and mitigate the risks and building a curriculum that teaches students to identify grooming behaviours.

5. CYBER ATTACKS

Data from the Department for Science, Innovation and Technology (DSIT) states that 73% of secondary schools and 49% of primary schools identified a cyber breach or attack in the past 12 months (a significant jump from the previous year). Phishing remains the biggest entry point. AI is being used by scammers to generate sophisticated, error-free phishing emails targeting school administration and staff accounts. Schools are encouraged to ensure that they bridge the gap between technical understanding/cyber security policies, and operational understanding and practice.
